

Tops and Bottoms

1	Hare did not have a job and the kids were hungry...
2	Hare really took advantage of Bear by tricking him... once Bear picked the tops of the crop, Hare grew carrots, radishes, etc.
3	Bear was very lazy, he slept through the growing of each crop...
4	Once, Bear picked the bottoms of the crops... Hare grew vegetables that grow on top...
5	Another time Bear chose tops and bottoms... Hare then grew corn.
6	Finally, Bear said that's it, I am growing my own crops from now on.
7	Hare opened his own vegetable stand...
8	They never were business partners again!
