

# William's House

<b>1</b>	William wanted a house just like the one he grew up in over in England.
<b>2</b>	William's wife wanted a window and he made one out of an animal horn!
<b>3</b>	They had to build their table and beds to sleep in also.
<b>4</b>	They created a cellar under the ground to keep the food from spoiling.
<b>5</b>	They had to clear the trees near the house to keep from getting crushed from the falling trees.
<b>6</b>	There was way more snow here in the winter than back home in England.
<b>7</b>	They built a new very steep roof to keep the snow off of it.
<b>8</b>	William built a big fireplace in the middle of the wall for more heat.
